Studio A

Studio A has everything you need to achieve world class results. It features 4 interlinked recording spaces, making it ideal for “live” tracking while still achieving discreet, no spill, multi track recordings. Each room is designed as a different acoustically tuned environment, making it suitable for a wide variety of musical styles.

Studio A has a world class selection of microphones and racks of state of the art mic pre’s and converters. The large comfortable control room is perfectly acoustically tuned and features 3 choices of classic monitor systems including Emes

Studios A, B & C come equipped with amps, drum kit, keyboard, all available for use at no extra cost if required. To make great recordings you must first have a recording space that inspires people to perform at their best. At Studio 52 we strive to make the recording process easy and stress free.

and JBL for great mixing and mastering control. The studio also features the amazing TC6000 Series reverbs.

The **Studio A** drum room is powered by 12 channels of A Grade British Valve pre’s for that awesome warm, fat analogue drum sound and the room itself is designed to be easily tuned from “totally live”, right down to “dead flat” and of course, anything in-between.

The combination of space, gear and great engineers makes Studio A one of the finest recording and mixing studios in Australia.

Studio B

Studio B is a lower priced alternative but is still totally capable of producing outstanding results. It has an exceptional drum room linked, with great sight lines, to a large general recording room. The spacious control room features great monitoring, state of the art mic

pre's and TC6000 Reverbs.

Studio B is perfect for demo recordings and independent albums. All our studios are totally compatible with each other allowing projects to easily move between studios for tracking/mixing/mastering.

Studio C

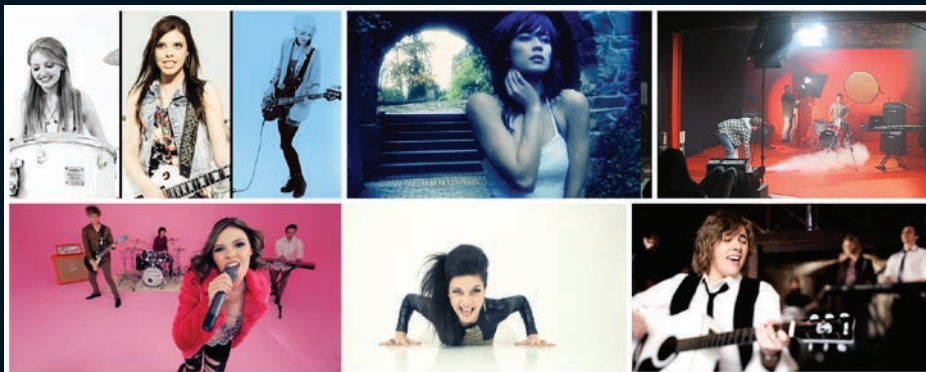

Studio C has been designed for versatility. It is our main production studio, perfect for one on one recordings between a vocalist and a producer and as our main programming suite used with solo artists. This studio is also our mastering room. However this studio can also be used for full band recordings, featuring a large drum booth inter connecting with two great recording spaces. Like **Studio A** the drum room is connected to a rack of A Grade British Valve pre's and the other two rooms have a selection of state of the art mic pre's and converters. The acoustically designed control room feature the amazing ADAM S3X-H studio monitors.

Studio D

Artwork, Photography & Video Production

Studio D offers a full range of graphic art and photography and video production. So whether you are needing to put your CD cover together, get some new promo photo shots or make a broadcast ready film clip, it can all be provided with the same level of professional service that the studio has been known for almost 30 years. Check out some of the most recent clips we have created on our you tube channel youtube.com/52koolempeire including Natasha Duarte's clip "Punch Me In The Heart" which recently won best music video in the prestigious UK Songwriting Competition.

Kitchen & Recreation Area

Studio 52 offers a range of extra facilities designed to make your recording experience a pleasant one. These include a large kitchen, meals area, TV and pool room. This is a great area to chill out, meet other artists recording within the building and enjoy free tea or coffee.

CD Manufacture & Distribution

Talk to us about your complete CD manufacture requirements and national distribution for your release. Our affiliate label Empire Records and Publishing distributes through MGM and from time to time offers this on-service to our clients. *(This is not guaranteed simply by recording at Studio 52 and is subject to normal distribution criteria and individual agreement to be negotiated.)
